

GIPPSLAND SCHOOLS WEB DESIGN SERVICE

Web Feats for Schools is now designing mobile friendly websites.

Responsive Websites

Web Feats for Schools creates professional, affordable, mobile friendly websites for Gippsland Schools that look great on any mobile device or desktop. Designing websites to be responsive enables pages to dynamically adjust their width and images to fit any view-port.

Why buy a website with an expensive Content Management System if you don't need it?

Most small and rural schools do not need to buy a website that comes with a complete Content Management System (CMS) that will tie you to expensive ongoing costs for hosting for as long as your website is online. With a Web Feats for Schools website you pay one package price. That's it. You will be able to update your own documents and photos yourself when the website is completed with no ongoing fees or hosting costs.

Smartphone Applications

Schools that currently use a [smart phone app](#) to communicate with parents such as TiqBiz or Skoolbag may be able to have the feed from their school app embedded within their school website. If your school has a Facebook, Twitter or Instagram or other social media account that you would like parents to check on a regular basis, the simplest way to do this is to have links created on your school's Home Page.

Web Feats for Schools is a specialist in school web design and since 2006 has provided a complete web design service for schools throughout Gippsland, including website management training for school staff. You can find the portfolio and links to websites on the [Schools page](#) of Web Feats for Schools website.

Web Feats for Schools is managed by a former teacher who taught in the Gippsland region for many years. With a teaching background in Digital Media and Graphic Design in both the Secondary & TAFE education sectors, Web Feats for Schools understands the needs of schools when it comes to designing a website.

WEB DESIGN PACKAGE INCLUDES:

- all consultation
- photography on site at your school
- individual banner collages on every page
- all website design & web development
- writing of page content (based on existing school documents such as parent handbooks, repurposed for the web context)
- supply of a temporary web address to view your web pages online during construction
- supply & installation free software to enable you to upload your documents & images once your website is completed & online
- on site web update training for staff

WEB UPDATE TRAINING

Web Feats for Schools provides training in the form of on site PD for staff, support notes and video tutorials to show you step by step how to manage and update your school's website after it is online.

If you do not have the time or would prefer Web Feats to update your website there are also a range of update package options available.

SCHOOL LOGO DESIGN / REDESIGN

Is your school logo looking a bit tired? Existing logos can be retraced & cleaned up in a vector program. The resulting graphic in vector format (SVG) can then be scaled up or down to any size with no reduction in resolution. Ideal for large scale application such as external school signs and small items such as school stationery.
